

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started out on a cross country RV expedition. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

While on their journey, John spent time conversing with previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered an infinite marketplace for a product that could quickly and safely lift individuals in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John established a joint venture with two friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty staff, they built and sold the first JLG aerial work platform. The company incorporates many of the basic design essentials of that original lift into current models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into many different international marketplaces and continues to cultivate new equipment to ensure that clients are able to become safer and more efficient within their workplace.
